Donating Personal Protective Equipment during the COVID-19 Pandemic

There has been a lot of interest from the veterinarian community on donating unused personal protective equipment (PPE) during the COVID-19 pandemic. The Wisconsin Department of Health Services (DHS) provided us some details regarding PPE donations and buyback programs.

At this time, DHS is only accepting **unopened** boxes/packages with quantities of 50 or more for the PPE donation/buyback program.

DHS established a website for central collection and distribution of PPE and other essential supplies. If you wish to donate PPE or submit to the buyback program, please complete the form at <https://covid19supplies.wi.gov/Donations>. Prospective contributors will be contacted by the triage team.

We appreciate all offers to help. We're asking anyone with unopened boxes/packages with quantities of 50 or fewer to consider donating the supplies to local police/fire/EMT services or other local emergency or health care organizations.
