

## **DATCP COVID-19 Livestock Producer Resources**

COVID-19 has presented numerous challenges for Wisconsin's livestock farmers, and DATCP is here to serve as a resource. DATCP's Resource Coordination Center connects farmers with the assistance they need. The resource center first facilitates alternative paths to slaughter channels. If those channels are unavailable, it will connect farmers with resources and options for humane euthanasia and disposal specific to their farm. [Visit and share the website.](#)
